# 1 Introduction

## 2 Threads Integration

### 2.1 Threads Team A

#### 2.1.1 Architectural Requirements

Architectural requirement	Met (Yes/No)
TestVALUE	No
TestValue	Yes

#### 2.1.2 Functional Testing

if success:

**Test One Name**

**Expected Test output** Please write what the client expected the test to do.

**Actual Test output** This test was a success  
if it is not a success:

**Test Two Name**

**Expected Test output** Please write what the client expected the test to do.

**Actual Test output** This test was a failure for the following reasons

- because the team didn't implement this
- because testing

#### 2.1.3 Non-Functional Testing

**Problem name 1 identified - e.g. Scalability** this is why this is an issue with scalability, blah blah blah

**Example of problem** this problem is caused because of potatoes.  
maybe add picture if required.

**Problem name 2 identified - e.g. Security** this is why this is an issue  
with Security, blah blah blah

**Example of problem** this problem is caused because of potatoes.  
maybe add picture if required.

## 2.2 Threads Team B

### 2.2.1 Architectural Requirements

Architectural requirement	Met (Yes/No)
TestVALUE	No
TestValue	Yes

### 2.2.2 Functional Testing

if success:

#### Test One Name

**Expected Test output** Please write what the client expected the test  
to do.

**Actual Test output** This test was a success  
if it is not a success:

#### Test Two Name

**Expected Test output** Please write what the client expected the test  
to do.

**Actual Test output** This test was a failure for the following reasons

- because the team didn't implement this
- because testing

### **2.2.3 Non-Functional Testing**

**Problem name 1 identified - e.g. Scalability** this is why this is an issue with scalability, blah blah blah

**Example of problem** this problem is caused because of potatoes. maybe add picture if required.

**Problem name 2 identified - e.g. Security** this is why this is an issue with Security, blah blah blah

**Example of problem** this problem is caused because of potatoes. maybe add picture if required.

## **2.3 Threads Comparison**

## 3 Status Integration

### 3.1 Status Team A

#### 3.1.1 Architectural Requirements

Architectural requirement	Met (Yes/No)
TestVALUE	No
TestValue	Yes

#### 3.1.2 Functional Testing

if success:

**Test One Name**

**Expected Test output** Please write what the client expected the test to do.

**Actual Test output** This test was a success  
if it is not a success:

**Test Two Name**

**Expected Test output** Please write what the client expected the test to do.

**Actual Test output** This test was a failure for the following reasons

- because the team didn't implement this
- because testing

#### 3.1.3 Non-Functional Testing

**Problem name 1 identified - e.g. Scalability** this is why this is an issue with scalability, blah blah blah

**Example of problem** this problem is caused because of potatoes.  
maybe add picture if required.

**Problem name 2 identified - e.g. Security** this is why this is an issue  
with Security, blah blah blah

**Example of problem** this problem is caused because of potatoes.  
maybe add picture if required.

## 3.2 Status Team B

### 3.2.1 Architectural Requirements

Architectural requirement	Met (Yes/No)
TestVALUE	No
TestValue	Yes

### 3.2.2 Functional Testing

if success:

#### Test One Name

**Expected Test output** Please write what the client expected the test  
to do.

**Actual Test output** This test was a success  
if it is not a success:

#### Test Two Name

**Expected Test output** Please write what the client expected the test  
to do.

**Actual Test output** This test was a failure for the following reasons

- because the team didn't implement this
- because testing

### 3.2.3 Non-Functional Testing

**Problem name 1 identified - e.g. Scalability** this is why this is an issue with scalability, blah blah blah

**Example of problem** this problem is caused because of potatoes. maybe add picture if required.

**Problem name 2 identified - e.g. Security** this is why this is an issue with Security, blah blah blah

**Example of problem** this problem is caused because of potatoes. maybe add picture if required.

## 3.3 Status Comparison

## 4 Resources Integration

### 4.1 Resources Team A

#### 4.1.1 Architectural Requirements

Architectural requirement	Met (Yes/No)
TestVALUE	No
TestValue	Yes

#### 4.1.2 Functional Testing

if success:

**Test One Name**

**Expected Test output** Please write what the client expected the test to do.

**Actual Test output** This test was a success  
if it is not a success:

**Test Two Name**

**Expected Test output** Please write what the client expected the test to do.

**Actual Test output** This test was a failure for the following reasons

- because the team didn't implement this
- because testing

#### 4.1.3 Non-Functional Testing

**Problem name 1 identified - e.g. Scalability** this is why this is an issue with scalability, blah blah blah

**Example of problem** this problem is caused because of potatoes.  
maybe add picture if required.

**Problem name 2 identified - e.g. Security** this is why this is an issue  
with Security, blah blah blah

**Example of problem** this problem is caused because of potatoes.  
maybe add picture if required.

## 4.2 Resources Team B

### 4.2.1 Architectural Requirements

Architectural requirement	Met (Yes/No)
TestVALUE	No
TestValue	Yes

### 4.2.2 Functional Testing

if success:

#### Test One Name

**Expected Test output** Please write what the client expected the test  
to do.

**Actual Test output** This test was a success  
if it is not a success:

#### Test Two Name

**Expected Test output** Please write what the client expected the test  
to do.

**Actual Test output** This test was a failure for the following reasons

- because the team didn't implement this
- because testing

### 4.2.3 Non-Functional Testing

**Problem name 1 identified - e.g. Scalability** this is why this is an issue with scalability, blah blah blah

**Example of problem** this problem is caused because of potatoes. maybe add picture if required.

**Problem name 2 identified - e.g. Security** this is why this is an issue with Security, blah blah blah

**Example of problem** this problem is caused because of potatoes. maybe add picture if required.

## 4.3 Resources Comparison

## 5 Reporting Integration

### 5.1 Reporting Team A

#### 5.1.1 Architectural Requirements

Architectural requirement	Met (Yes/No)
TestVALUE	No
TestValue	Yes

#### 5.1.2 Functional Testing

if success:

**Test One Name**

**Expected Test output** Please write what the client expected the test to do.

**Actual Test output** This test was a success  
if it is not a success:

**Test Two Name**

**Expected Test output** Please write what the client expected the test to do.

**Actual Test output** This test was a failure for the following reasons

- because the team didn't implement this
- because testing

#### 5.1.3 Non-Functional Testing

**Problem name 1 identified - e.g. Scalability** this is why this is an issue with scalability, blah blah blah

**Example of problem** this problem is caused because of potatoes.  
maybe add picture if required.

**Problem name 2 identified - e.g. Security** this is why this is an issue  
with Security, blah blah blah

**Example of problem** this problem is caused because of potatoes.  
maybe add picture if required.

## 5.2 Reporting Team B

### 5.2.1 Architectural Requirements

Architectural requirement	Met (Yes/No)
TestVALUE	No
TestValue	Yes

### 5.2.2 Functional Testing

if success:

#### Test One Name

**Expected Test output** Please write what the client expected the test  
to do.

**Actual Test output** This test was a success  
if it is not a success:

#### Test Two Name

**Expected Test output** Please write what the client expected the test  
to do.

**Actual Test output** This test was a failure for the following reasons

- because the team didn't implement this
- because testing

### 5.2.3 Non-Functional Testing

**Problem name 1 identified - e.g. Scalability** this is why this is an issue with scalability, blah blah blah

**Example of problem** this problem is caused because of potatoes. maybe add picture if required.

**Problem name 2 identified - e.g. Security** this is why this is an issue with Security, blah blah blah

**Example of problem** this problem is caused because of potatoes. maybe add picture if required.

## 5.3 Reporting Comparison
